

## **AMENDMENTS TO SPECIFICATION**

Please amend the last paragraph on page six of the specification as follows:

When a dog chews the center part of the roll, this part will act as a toothbrush to clean the surfaces of the dog's teeth. This action is assisted by the windows 22 which are not penetrated by the dog's teeth. When the dog chews on the ends, the strips 46 14 act as a floss to clean the spaces between the teeth.
